A Guide to Australian Resources for Teachers  
and Parents

# Responsible Gambling Education:

## A Guide to Australian Resources for Teachers and Parents

As young people approach eighteen and begin to earn their own money they will encounter a plethora of choice for spending on entertainment, hospitality and leisure activities - including gambling.

Changes in digital technology and access to the internet have also increased exposure and opportunities for young people to gamble.

It is more important than ever for young people to understand the nature of gambling and responsible gambling behaviours and attitudes.

The Australasian Gaming Council (AGC) believes that financial literacy programs and responsible gambling education programs can support young people in developing the critical knowledge, skills and attitudes required to make careful choices about their discretionary spending.

The AGC supports the development of responsible gambling education programs linking gambling education with financial literacy and, increasingly, with cyber-safety.

To assist parents and teachers in understanding the various resources currently available for young people this guide outlines contemporary financial literacy, responsible gambling education and cyber-safety resources available to students, teachers and parents in Australia.

The summary for each resource highlights useful information about the organisation responsible for the initiative, the target audience and the availability of information for parents.

The AGC hopes that this guide provides you with a workable tool to assist in the identification and selection of currently available resources.

Additional resources will be added as they become available.
